## What information we collect about you

We collect information about you when you provide it to us, when you use our Product and when other sources provide it to us, as further described below.

## Information you provide to us

We collect information about you when you input it into the Product or otherwise provide it directly to us.

- Content you provide through our product: The Product includes the PC desktop application and Google Forms Questionnaire you use, where we collect and store content that you post, send, receive and share. This content includes any

information about you that you may choose to include. The questionnaire contains questions regarding the user evaluation of and experience when using the system. Please be aware that our Product may contain third-party content.

## **Information we collect automatically when you use the Product.**

We do not collect information about you when you use our Product automatically.

- Your use of the Product: the data collected from the application itself contains the time elapsed per generation step per configuration tested, and the user engagement measured as the number of spaceships inspected each generation per configuration tested. However, the data is sent to us only manually by you as a file attached to the Google Form questionnaire. This step is fully voluntary and does not prevent you from using the product.

## **How we use information we collect**

Below are the specific purposes for which we use the information we collect about you.

- For research and development: We are always looking for ways to make our Product smarter, faster, secure, integrated and useful to you.
